"The epic story of the rise and fall of the empire of cotton, its centrality in the world economy, and its making and remaking of global capitalism. Sven Beckert's rich, fascinating book tells the story of how, in a remarkably brief period, European entrepreneurs and powerful statesmen recast the world's most significant manufacturing industry combining imperial expansion and slave labor with new machines and wage workers to change the world. Here is the story of how, beginning well before the advent of machine production in 1780, these men created a potent innovation (Beckert calls it war capitalism, capitalism based on unrestrained actions of private individuals; the domination of masters over slaves, of colonial capitalists over indigenous inhabitants), and crucially affected the disparate realms of cotton that had existed for millennia. We see how this thing called war capitalism shaped the rise of cotton, and then was used as a lever to transform the world. The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, farmers and merchants, workers and factory owners. In this as in so many other ways, Beckert makes clear how these forces ushered in the modern world. The result is a book as unsettling and disturbing as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist"--R \u00e9 sum \u00e9 de l' \u00e9 diteur.

A New York Times Notable Book of 2020 A Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you ' re rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In The WEIRDest People in the World, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, The WEIRDest People in the World explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Renowned psychologist Walter Mischel, designer of the famous Marshmallow Test, explains what self-control is and how to master it. A child is presented with a marshmallow and given a choice: Eat this one now, or wait and enjoy two later. What will she do? And what are the implications for her behavior later in life? The world's leading expert on self-control, Walter Mischel has proven that the ability to delay gratification is critical for a successful life, predicting higher SAT scores, better social and cognitive functioning, a healthier lifestyle and a greater sense of self-worth. But is willpower prewired, or can it be taught? In The Marshmallow Test, Mischel explains how self-control can be mastered and applied to challenges in everyday life—from weight control to quitting smoking, overcoming heartbreak, making major decisions, and planning for retirement. With profound implications for the choices we make in parenting, education, public policy and self-care, The Marshmallow Test will change the way you think about who we are and what we can be.

"An engrossing and impossibly wide-ranging project . . . In The Free World, every seat is a good one." —Carlos Lozada, The Washington Post "The Free World sparkles. Fully original, beautifully written . . . One hopes Menand has a sequel in mind. The bar is set very high." —David Oshinsky, The New York Times Book Review | Editors' Choice One of The New York Times's 100 best books of 2021 | One of The Washington Post's 50 best nonfiction books of 2021 In his follow-up to the Pulitzer Prize–winning The Metaphysical Club, Louis Menand offers a new intellectual and cultural history of the postwar years The Cold War was not just a contest of power. It was also about ideas, in the broadest sense—economic and political, artistic and personal. In The Free World, the acclaimed Pulitzer Prize–winning scholar and critic Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of the mind. How did elitism and an anti-totalitarian skepticism of passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of " freedom " applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even crime? With the wit and insight familiar to readers of The Metaphysical Club and his New Yorker essays, Menand takes us inside Hannah Arendt ' s Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage ' s residencies at North Carolina ' s Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and pop art, Allen Ginsberg ' s friendship with Lionel Trilling, James Baldwin ' s transformation into a Civil Right spokesman, Susan Sontag ' s challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World War, but America ' s once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened.

In this companion volume to the acclaimed classic The Overthrow of Colonial Slavery, Robin Blackburn traces European doctrines of race and slavery from medieval times to the early modern epoch. At the time when European powers colonized the Americas, the institution of slavery had almost disappeared from Europe itself. Having overcome an institution widely regarded as oppressive, why did they sponsor the construction of racial slavery in their new colonies? The Making of New World Slavery finds in the emergent West both a stigmatization of the ethno-religious Other and a new culture of consumption, freed from earlier moral restrictions. Robin Blackburn argues that independent commerce, geared to burgeoning consumer markets, was the driving force behind the rise of plantation slavery. The Baroque state fed greedily off this commerce whilst unsuccessfully seeking to regulate slavery. Successive chapters of the book consider the deployment of slaves in the colonial possessions of the Portuguese, the Spanish, the Dutch, the English and the French. Robin Blackburn argues that the organization of slave plantations placed the West on a destructive path to modernity and that greatly preferable alternatives were both proposed and rejected. Finally he shows that the surge of Atlantic trade, premised on the killing toil of the plantations, made a decisive contribution to both the Industrial Revolution and the rise of the West. The Making of New World Slavery is a masterly study of this momentous and baleful epoch in the making of the modern world.

Do you believe that spending \$15,000 on a media center is vulgar, but that spending \$15,000 on a slate shower stall is a sign that you are at one with the Zenlike rhythms of nature? Do you work for one of those visionary software companies where people come to work wearing hiking boots and glacier glasses, as if a wall of ice were about to come sliding through the parking lot? If so, you might be a Bobo. In his bestselling work of "comic sociology," David Brooks coins a new word, Bobo, to describe today's upper class -- those who have wed the bourgeois world of capitalist enterprise to the hippie values of the bohemian counterculture. Their hybrid lifestyle is the atmosphere we breathe, and in this witty and serious look at the cultural consequences of the information age, Brooks has defined a new generation.

From 1400 to 1900 the Atlantic Ocean served as a major highway, allowing people and goods to move easily between Europe, Africa, and the Americas. These interactions and exchanges transformed European, African, and American societies and led to the creation of new peoples, cultures, economies, and ideas throughout the Atlantic arena. The Atlantic World provides a comprehensive and lucid history of one of the most important and impactful cross-cultural encounters in human history. Empires, economies, and trade in the Atlantic world thrived due to the European drive to expand as well as the creative ways in which the peoples living along the Atlantic's borders adapted to that drive. This comprehensive, cohesively written textbook offers a balanced view of the activity in the Atlantic world. The 40 maps, 60 illustrations, and multiple excerpts from primary documents bring the history to life. Each chapter offers a reading list for those interested in a more in-depth look at the period.
