lighting. A photographer is always thinking to fill the frame with interesting subjects, to match the proper background, and to have the appropriate exposure. Sometimes less is more.

### *Keep it Simple in Photography | Take Better Shots*

There is no right or wrong type, though a specific one may be best for you and your photography. Simple point-and-shoot digital cameras can give surprising quality when they have the right lenses and sensors. Because they are totally automatic in focus and exposure, they just have to be pointed at a subject and clicked.

That said, here are some simple things to keep in mind: With landscapes you usually want everything in focus, which the camera sometimes doesn't understand. Most cameras have a "landscape" scene mode for just these occasions. Also, when capturing portraits of people or animals, it's best to focus on the eyes above all else.
