HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

EPA 608 Certification: Everything You Need to Know What is an EPA 608 Certification? How do I get EPA 608 certified? Is the EPA 608 test hard? This study guide is designed for those who are taking an EPA approved certification exam for the first time--and for those who may not have been successful on their first attempt. It features reviews of all key topic areas; 75 example questions (like those found on the actual exam) for each of the four EPA certification test areas--CORE, TYPE 1, TYPE II, and TYPE III (300 questions total, with answers); and test-taking techniques and strategies. An extensive Appendix includes EPA Section 601 through 618 of Title VI; EPA approved Technician Certification Programs, by state; and a Glossary.Refrigeration System Review. Temperature- Pressure Chart. Be Test Wise. Test-Taking Techniques. Test-Taking Strategies. Health and Safety. Clean Air Act. Stratospheric Ozone Protection. Certification--CORE, Type I, Type II, Type III. Appendix: Title VI--Stratospheric Ozone Protection. Section 601 through Section 618. Technician Certification Programs.For those preparing for the EPA Certification for Refrigeration Handling examination.

As the HVACR industry continues to move forward and innovate, the refrigerants that were once so commonplace are now being phased out. Replacing them are more energy efficient, environmentally friendlier refrigerants, known as Low GWP refrigerants. Many of these new refrigerants are classified by ASHRAE as A2L, or slightly flammable. The industry is also seeing expanded use of some hydrocarbon (A3) refrigerants, such as propane and isobutane. Students and technicians will require additional training for the safe handling and transportation of these refrigerants. The Low GWP refrigerant program manual covers: Refrigerant safety Introduction to Low GWP refrigerants Refrigerant properties and characteristics The refrigeration cycle Working with refrigerant blends Proper installation and service guidelines Flammable refrigerant considerations Explanation of the associated codes and standards for A2L refrigerants

This manual was developed to provide field service personnel with the necessary training and practical knowledge to safely perform service on systems containing R-410A and R-407C. In addition, this manual includes information on: R-22 phase out, appropriate refrigerant and oil applications, service techniques, as well as safe handling of R-410A. It contains all the information technicians will need to prepare for their R-410A safety certification.

The fifth edition of Delmar's Automotive Service Excellence (ASE) Test Preparation Manual for the A7 HEATING AND AIR CONDITIONING certification exam contains an abundance of content designed to help you successfully pass your ASE exam. This manual will ensure that you not only understand the task list and therefore the content your actual certification exam will be based upon, but also provides descriptions of the various types of questions on a typical ASE exam, as well as presents valuable test taking strategies enabling you to be fully prepared and confident on test day.
