This is the leading text available on company law. It provides clarity while covering all key areas by way of a detailed, in-depth analysis.

This edition of the classic text on the law and practice of company law incorporates the latest developments including the fundamental changes brought about by the Companies Act 2006 and covers recent key case law.

Written by one of the foremost experts in the area, Paul Davies' Introduction to Company Law provides a comprehensive conceptual introduction, giving readers a clear framework with which to navigate the intricacies of company law. The five core features of company law - separate legal personality, limited liability, centralized management, shareholder control, and transferability of shares - are clearly laid out and examined, then these features are used to provide an organisation structure for the conduct of business. It also discusses legal strategies that can be used to deal with arising problems, the regulation of relationships between the parties, and the trade-offs that have been made in British company law to address some of the conflicting issues that have arisen. Fully revised to take into account the Companies Act 2006, and including a new chapter on international law which considers the role of European Community Law, this new edition in the renowned Clarendon Law Series offers a concise and stimulating introduction to company law.

Company Law 3e provides an in-depth, sophisticated but readable account of the major topics commonly studied in Company Law courses. Hannigan captures the dynamism of the subject, highlights its relevance and topicality and, above all, helps students master its intricacies.

Gower and Davies has long been recognised as the leading text on company law, its lucid analysis and accessible style being of great assistance and encouragement to all those involved in this area. Its undisputed strength lies in covering the considerable breadth of company law by way of a detailed, in-depth analysis.

Gower and Davies has long been recognised as the leading text on company law, its lucid analysis and accessible style being of great assistance and encouragement to all those involved in this area. Its undisputed strength lies in covering the considerable breadth of company law by way of a detailed, in-depth analysis.

Sealy and Worthington's Text, Cases, and Materials in Company Law clearly explains the fundamental structure of company law and provides a concise exploration of each different aspect of the subject. The materials are carefully selected and well supported by commentary so that the logic of the doctrinal or legal argument is unambiguously shown. Notes and questions appear periodically throughout the text to provoke ongoing analysis and debate and enable students to test their understanding of the issues as the topics unfold. This text covers a wide range of sources and provides intelligent and thought provoking commentary in a succinct format. It will be invaluable to all those looking for expert observations and vital materials on company law.

Dr Talbot traces the history of the fundamental principles of English company law, including the doctrine of separate corporate personality, director's duties, minority protection and the doctrine of ultra vires from both a black letter and contextual perspective. Relevant aspects of the Companies Act 2006 are thoroughly examined. Drawing on the influence of American law and scholarship, the book considers the ideas which have informed corporate governance in England. It includes a case study of mutual building societies' march to the market and corporate identity. The hybrid approach adopted in the text provides a contextual and critical framework in which to understand company law as well as a broad picture in black letter law terms. The aim is to invigorate what many students and academics consider a dry subject by uncovering the social factors which continue to inform this area of law - and the political nature of the law itself. Dr Talbot maintains that modern company law is shaped by three main factors - economics, ideology and existing law. The state of the law at any one time is determined by the constantly shifting relationship between these factors.
