Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data, collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research-generated insights have a tangible, beneficial impact on what is happening in mathematical classrooms. Combining two discourses - that of researchers speaking to one another, and that of researchers communicating their insights to those responsible for educational practice - the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

The standards-based Spectrum (R) Critical Thinking for Math for second grade guides children through problem-solving strategies including: -addition and subtraction -measurement -geometry Spectrum Critical Thinking for Math helps children apply classroom math skills to real-world scenarios. Spectrum Critical Thinking for Math provides problem-solving instruction, math reasoning questions, and word problems that encourage students to extend classroom learning to the real world. Complete with problem-solving instruction, reasoning questions, word problems, pretests, post-tests, and a completed answer key, this series helps children retain knowledge while introducing problem-solving methods for success. Providing comprehensive, grade-specific titles that encourages the skills and standards taught in today's classroom, Spectrum supports your child's educational journey every step of the way. Spectrum offers a variety of subject-specific practice to reinforce classroom learning, skill-specific titles to enhance educational concepts, and test prep titles to improve test-taking skills. Spectrum is here to help every child get ahead.

Study & Master Mathematical Literacy Grade 11 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Mathematical Literacy. The comprehensive Learner's Book includes: * thorough coverage of the basic skills topics to lay a sound foundation for the development of knowledge, skills and concepts in Mathematical Literacy * margin notes to assist learners with new concepts - especially Link boxes, that refer learners to the basic skills topics covered in Term 1, Unit 1-16 * ample examples with a strong visual input to connect Mathematical Literacy to everyday life.
