Written by one of the founders of gas-chromotagraphic methods in radiochemistry, this book attempts a genuine first. It is a discussion of the state of art of heavy element inorganic radiochemistry. It aims to be a real addition to the understanding of this crucial topic. Written as much for newcomers to the field as experts, its goal is also to stimulate wider use of the advantageous gas phase techniques for common elements.

Nuclides net describes an integrated environment for computations on radionuclides and their radiation. In addition to providing the necessary background on the physics and radiology of familiar nuclides. Through an electronic nuclide chart, the user can access codes, via the Internet, for a number of applications which allow the required data to be computed quickly and reliably by means of interactive user guidance. Nuclides.net can be used for teaching, research, and for practical applications.

This exercise book contains 300 typical problems and exercises in modern physics and radiation Physics for Medical Physicists", Springer (2010) but can also be used in combination with other related textbooks. For ease of use, this textbook has exactly the same organizational layout (14 chapters, 128 sections) as the "Radiation Physics for Medical Physics, radiation is covered by at least one problem with solution given. Equations, figures and tables are cross-referenced between the two books. It is the only large compilation of textbook material and associated solved problems in medical physics, radiation physics, and biophysics.

Presented in two parts, this first comprehensive overview addresses all aspects of energetic ion irradiation of polymers. Earlier publications, such as in photoresists, waveguides, and medical dosimetry, during the last decade. The first part, Fundamentals of Ion Irradiation of Polymers covers the physical, chemical and instrumental fundamentals; treats the specific irradiation. All the new findings are carefully analyzed and presented in a systematic way, while open questions are identified.
