JONA: The Journal of Nursing Administration

We need both: being inspirational (leadership) while simultaneously organizing care delivery—sometimes down to the plan for the next hour (management). Perhaps our management side expects a business plan for every change with return on investment down to the penny, whereas our leadership half knows that some investments are returned in morale and staff engagement.

This new approach to leadership focuses on how students can develop leadership skills right from the start of their nursing programme through to transitioning to their first role. The book first takes students through the underpinning

Online Library Leadership Nursing Journals

knowledge and theory and then through practical skills to help them understand all aspects of leadership and how it is a key component of providing quality care to patients in a range of environments and settings. Real stories from nursing leaders, practitioners and students are included to inspire students and show them how they can impact positively on practice, whatever level they are working at. Key features include: Real life focus, grounded in everyday practice, with lots of case studies and examples to help students see how theory relates to practice Activities to help students reflect about their own practice, and about themselves as leaders Video interviews with nurse leaders and students on the companion website Further reading and links to journal articles in both the book and the companion

website help students delve deeper and prepare for assessments.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care

Online Library Leadership Nursing Journals

as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Online Library Leadership Nursing Journals

The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health

Online Library Leadership Nursing Journals

equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. The Future

Online Library Leadership Nursing Journals

of Nursing 2020-2030: Charting a Path to Achieve Health Equity explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by The Future of Nursing: Leading Change, Advancing Health (2011) report.

Uniquely organized around the AONE competencies, this trusted resource gives you an easy-to-understand, in-depth look at today ' s most prevalent nursing leadership and management topics. Diane Whitehead takes the role as the lead author with the newest edition of *Essentials of Nursing Leadership & Management*. The biggest change past users will find over the previous edition is the use of four color throughout the

Online Library Leadership Nursing Journals

entire text. The new design provides a fresh look to accompany the new and revised content from cover to cover. New content includes coverage of contemporary workplace issues, including agency nurses and staff shortages. With the easy-to-read style, instructor focus, comprehensive content, emphasis on current issues and trends, and the new full-color design - the fourth edition will appeal to novice faculty looking for teaching strategies applicable to today's students.

This text provides nurses studying leadership theory with insight and guidance in motivating and leading staff. The concepts of transformational leadership are explored to direct the nurse leader in increasing productivity and retention of staff.

Online Library Leadership Nursing Journals

Designed for the management and development of professional nurses, this text provides management concepts and theories, giving professional administrators theoretical and practical knowledge, enabling them to maintain morale, motivation, and productivity. Organized around the four management functions of Planning, Organizing, Leadership, and Evaluation, it includes new chapters on total quality management, the theory of human resource development, and collective bargaining. Additionally, content has been added to include recommendations from the work of the Institute of Medicine and the Magnet Appraisal process.

Social and behavioral science has for decades studied and

Online Library Leadership Nursing Journals

recognized leadership as a social exchange between leaders and followers. But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial settings and in nonprofit organizations.

Online Library Leadership Nursing Journals

Designated a Doody's Core Title! "The construction of the doctor of nursing practice (DNP) and the clinical nurse leader (CNL) set in motion a sea change in graduate nursing education. In this book, Fitzpatrick and Wallace document the history, the driving forces, and the expectations for these new roles while providing a starting point for capacity building for the development of DNP and CNL educational programs." --Nursing Education Perspectives The Research Journal of the National League for Nursing "This [book] is essential reading for graduate nursing students who are considering pursuing an advanced degree in nursing." Score: 100, 5 stars - -Doody's This is the first book to document and analyze the development and integration of the Clinical Nurse Leader (CNL) and Doctorate of Nursing Practice (DNP)

Online Library Leadership Nursing Journals

programs in graduate nursing institutions. Editors Fitzpatrick and Wallace, established authorities in nursing education, present this text as an introduction to these exciting new degrees. The contributors, ranging from architects of the programs to graduates from the programs, offer valuable information on the objectives, curricula, and expected outcomes of these two educational tracks. Ultimately, the book explores how the development of these new degrees has influenced health care delivery at large. Highlights of this book: Delineates core program requirements and outlines what is expected of students in both clinical and academic arenas Provides guidance to students making the transition from masters level nursing programs to doctoral level programs Includes two chapters written by the AACN

Online Library Leadership Nursing Journals

Taskforce on the new degrees, with essential information on how to gain and sustain accreditation Identifies critical issues underpinning future DNP and CNL program development, and discusses the impact of the new degrees on nursing education, patient outcome, and health care Offering comprehensive coverage of the DNP and CNL development, this book is required reading for students considering doctorates in nursing, as well as nurse educators and administrators working within the programs.

This is the first practical guide for nurses on how to incorporate the knowledge, skills, and tools of Strength-Based Nursing Care (SBC) into everyday practice. The text, based on a model developed by the McGill University

Online Library Leadership Nursing Journals

Nursing Program, signifies a paradigm shift from a deficit-based model to one that focuses on individual, family, and community strengths as a cornerstone of effective nursing care. The book develops the theoretical foundations underlying SBC, promotes the acquisition of fundamental skills needed for SBC practice, and offers specific strategies, techniques, and tools for identifying strengths and harnessing them to facilitate healing and health. The testimony of 46 nurses demonstrates how SBC can be effectively used in multiple settings across the lifespan.
