Alcohol-impaired driving is an important health and social issue as it remains a major risk to Americans' health today, surpassing deaths per year of certain cancers, HIV/AIDS, and drownings, among others, and contributing to long-term disabilities from head and spinal injuries. Progress has been made over the past decades towards reducing these trends, but that progress has been incremental and has stagnated more recently. Getting to Zero Alcohol-Impaired Driving Fatalities examines which interventions (programs, systems, and policies) are most promising to prevent injuries and death from alcohol-impaired driving, the barriers to action and approaches to overcome them, and which interventions need to be changed or adopted. This report makes broad-reaching recommendations that will serve as a blueprint for the nation to accelerate the progress in reducing alcohol-impaired driving fatalities.

Alcohol is a killer--1 of every 13 deaths in the United States is alcohol-related. In addition, 5 percent of the population consumes 50 percent of the alcohol. The authors take a close look at the problem in a "classy little study," as The Washington Post called this book. The Library Journal states, ". . . [T]his is one book that addresses solutions. . . . And it's enjoyably readable. . . . This is an excellent review for anyone in the alcoholism prevention business, and good background reading for the interested layperson." The Washington Post agrees: the book ". . . likely will wind up on the bookshelves of counselors, politicians, judges, medical professionals, and law enforcement officials throughout the country."

From 1900 to 1908 includes the "Annual digest of Canadian cases ... decided in the Judicial Committee of the Privy Council, in the Supreme and Exchequer Courts of Canada, and in the courts of the provinces ... Edited by Edward B. Brown."

Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks ¶" and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? Reducing Underage Drinking addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. Reducing Underage Drinking will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.
