The scientific and technological advances that influence the protection of cultural heritage are developing at an ever-increasing pace. Systems to explore, research and analyse their materiality, to control the different scopes, or to represent and model them have reached an unprecedented dimension in recent decades. The Network of Science and Technology for the Conservation of Cultural Heritage aims to promote collaboration between the agents of these systems, in order to facilitate the sharing of experiences and to foster technology transfer, with the common goal of contributing to the conservation of Cultural Heritage. In the context of the Techno-Heritage Network, the fourth edition of the International Congress on Science and Technology for the Conservation of Cultural Heritage was held March 26-30, 2019, in Seville, Spain. This Congress was an international meeting of researchers and specialists from multiple areas, whose line of work is the knowledge and conservation of Cultural Heritage. Among all the topics discussed, the role and impact of digital technologies for the knowledge, maintenance, management and dissemination of cultural heritage should be highlighted. Digital media modify the way of understanding this heritage, of perceiving it and transmitting it, and offer a new horizon of strategies to make decision-making more sustainable over time.

Graduate Thesis by Matthew Schlieb submitted for a Master in Architecture from Pratt Institute (1994), under the direction of Richard Scherr (M. Arch. Chair & Major Advisor), Deborah Gans (B. Arch. Chair & Major Advisor), Martin Skalski (Industrial Design Advisor), Architecture faculty John Johansen, Raimund Abraham, Giuliano Fiorenzoli, Livio Dimitriu, William Katavolos, Vito Acconci, James Rossant, Haresh Lalvani, John Lobei, Theoharis David, and Design faculty William Fogler and William Fasolino. An investigative research study into the visual perception of architectural space, exploring proxemic relationships between the inhabitant and inhabitable form. The research revealed the influence 'form articulation and spatial delineation' has on human behavior, establishing the ability to measure the location and extremes of perceptual envelopes and thresholds, and an analysis of human subconscious and foreconscious processes within the theory of Gestalt Psychology. An independent study within the Industrial Design department as thesis research isolated the movement of gesture in form on perceived envelopes and thresholds of activated space, through a comparative modeling technique in refining adjustments of an original prototype toward an improved unified condition.

Essa obra coletiva, cujos autores são alunos da turma de Tributação da Economia Digital e das novas tecnologias (ênfase na Tributação Direta) do programa de Mestrado e Doutorado do Programa de Pós-Graduação em Direito (PPG-Dir) da Universidade do Estado do Rio de Janeiro - UERJ, bem como membros do corpo docente e pesquisadores da UERJ trata de temas relevantes no âmbito da Tributação da Economia Digital internacional. A inquestionável relevância da disciplina e dessa obra se deve não só aos calorosos debates e alterações no cenário nacional e internacional no que tange ao tema da tributação das novas tecnologias, cada vez mais presente em nosso dia-dia, como também à necessidade prática de orientação do fisco e dos contribuintes no que tange à tributação das novas tecnologias, face aos diversos questionamentos que a temática levanta. Temas debatidos ao longo dessa obra como criptomoeidas, estruturação internacional, tributação de serviços considerando o cenário tecnológico, cadeia de valor e muitos outros estão no centro da pauta dos debates e questionamentos internacionais. A obra não pretende esgotar qualquer dos assuntos e sim servir de base para novas discussões e ideias de como lidar com a tributação da tecnologia que gera dúvidas e insegurança jurídica ao redor do mundo.

This books tells the neglected story of the relationship between custom and the European natural law and ius gentium tradition. It explores what cultural values and practices facilitated the emergence of custom and rendered it into as a source of the law of nations, and how they did so.

Developmental Human Behavioral Epigenetics: Principles, Methods, Evidence, and Future Directions, Volume 23, a new volume in the Translational Epigenetics series, offers the first systematic account of theoretical G79 frameworks, methodological approaches, findings, and future directions in the field of human behavioral epigenetics. Featuring contributions from leading scientists and international researchers, this book provides a comprehensive overview of human behavioral epigenetics, with a close examination of evidence gathered to-date from animal models, challenges of human-based research and clinical translation, pathways towards drug discovery, and next steps in research. Areas of focus include prenatal stress exposures, pretern behavioral epigenetics, intergenerational exposures, trauma and neglect, socio-economic conditions, maternal caregiving and attachment, study design, and epigenetics and psychotherapy. Enables more effective study design and methods application in behavioral epigenetics research across human and animal models Examines findings in human behavioral epigenetics to-date Features contributions from leading international researchers in behavioral epigenetics

This book presents interdisciplinary approaches to the examination and documentation of material cultural heritage, using non-invasive spatial and spectral optical technologies.

The unique contribution of Austrian avant-garde film to world cinema is widely acknowledged. This is the first book in English dedicated to its historical and aesthetic evolution. The expansive introductory essay by the editor provides a detailed overview of avant-garde film production in Austria, followed by twenty contributions from international film scholars who engage with the work of individual filmmakers. Beginning with the pioneers of independent filmmaking in post-war Austria, the book covers more than 60 years of subversive motion picture history: from Peter Kubelka's ground-breaking metric films of the 1950s to Kurt Kren's rapid-fire actionist films in the 1960s and subsequent time studies, from Valle Export's feminist cinema to Lisl Ponger's explorations of alternative ethnographies, from the exhilarating found footage works of Martin Arnold and Peter Tscherkassky to the recent generation of younger artists such as Michaela Grill and Siegfried Fruhauf whose innovative work also embraces digital technology. Contributors include Steve Anker, Steve Bates, Livio Bellò, Christa Blümlinger, Nicole Brenez, Stefan Grissemann, Christoph Huber, Adrian Martin, Maya McKechney, Maureen Turim, Norbert Pfaffenbichler, Andréa Picard, Barbara Pichler, Bert Rebhandl, Jonathan Rosenbaum, Hans Scheufl, and the editor.

'Rockin' Las Americas' explores the production, dissemination, & consumption of rock music throughout the Caribbean, Mexico, Central & South America, as well as among Latinos in the U.S. The contributors consider how rock has influenced Latin/Latino culture & how it relates to social issues in the region.
