Oracle® Applications System Administrator's Guide - Configuration Release 12 Part No. B31453-04 December 2007

Oracle® Applications

System administrators create the Site Repository definition and the site categories that are used to define sites in the Site Administration UI, and also configure the resources that can be shared within site groups.. Business users create and manage sites using the Site Administration utility. The settings specified in Site Administration are stored in the Site Repository.

Oracle Commerce Platform - Creating Multisite Applications

The implementor or system administrator sets up access control and security policies in Oracle E-Business Suite by defining roles, role inheritance hierarchies, role categories, and registration processes. These components specify the different levels of access to various application menus and data that are available to administrators.
