Sometimes referred to as a rear remote valve, is typically connected to your hydraulic system in series with your loader valve via the power beyond.

Rear Remotes - Summit Hydraulics

There's two types of detents that you can have in a rear remote, and the first of those types will be a float detent, where you push the valve forward and you'll feel a pop and it goes over top of a detent ball, and holds the valve in a forward position. Now, when you pop into that detent, you're going into what's known as float, and when you're in the float position, essentially you're just opening this thing up so the oil can freely flow from one side to
