Much of the material is drawn from John Colapinto's well-researched book, As Nature Made Him: The Boy Who Was Raised as a Girl. Bruce and his identical twin brother Brian were born in Winnipeg, Canada, on August 22, 1965. Seven months later, Bruce's penis was burned off in a botched circumcision. Famed sexologist John Money advised the parents to have Bruce castrated completely and to raise him as a girl.

We wanted to use Dr. Perry's first book, The Boy Who Was Raised as a Dog, as our background text and received permission to do that. We needed our staff to see and hear Dr. Perry as we had, and the CTA sent us videos to accomplish that professional and personal touch.

The Neurosequential Model in Education |

The Boy Who Was Raised as a Dog is a collection of case studies from a child psychiatrist, Dr. Bruce Perry, who uses his expertise in brain development and neuroscience to study how traumatic experiences shape behavior in children. Each chapter focuses on an individual child's case, including a child who was raised in a kennel, one who murdered two teenage girls, and another who witnessed her mother get killed.

A renowned psychiatrist reveals how trauma affects children--and outlines the path to recovery "Fascinating and upbeat....Dr. Perry is both a world-class creative scientist and a compassionate therapist." (Mary Pipher, PhD) How does trauma affect a child's mind--and how can that mind recover? In the classic The Boy Who Was Raised as a Dog, Dr. Perry explains what happens to the brains of children exposed to extreme stress and shares their lessons of courage, humanity, and hope. Only when we understand the science of the mind and the power of love and nurturing, can we hope to heal the spirit of even the most wounded child.

Child psychiatrist Bruce Perry has treated children faced with unimaginable horror: genocide survivors, witnesses, children raised in closets and cages, and victims of family violence. Here he tells their stories of trauma and transformation.

NEW YORK TIMES BESTSELLER | We should aspire to Colapinto's stellar journalist example: listening carefully to the circumstances of those who are different rather than demanding that they conform to our own. | Washington Post The true story about the "twins case" and a riveting exploration of medical arrogance, misguided science, societal confusion, gender differences, and one man's ultimate triumph In 1967, after a twin baby boy suffered a botched circumcision, his family agreed to a radical treatment that would alter his gender. The case would become one of the most famous in modern medicine--and a total failure. The boy's uninjured brother, raised as a boy, provided to the experiment the perfect matched control. As Nature Made Him tells the extraordinary story of David Reimer, who, when finally informed of his medical history, made the decision to live as a male. Writing with uncommon intelligence, insight, and compassion, John Colapinto sets the historical and medical context for the case, exposing the thirty-year-long scientific feud between Dr. John Money and his fellow sex researcher, Dr.

Milton Diamond—a rivalry over the nature/nurture debate whose very bitterness finally brought the truth to light. A macabre tale of medical arrogance, it is first and foremost a human drama of one man's—and one family's—amazing survival in the face of terrible odds.

The groundbreaking exploration of the power of empathy by renowned child-psychiatrist Bruce D. Perry, co-author, with Oprah Winfrey, of *What Happened to You? Born for Love* reveals how and why the brain learns to bond with others—and is a stirring call to protect our children from new threats to their capacity to love. “Empathy, and the ties that bind people into relationships, are key elements of happiness. *Born for Love* is truly fascinating.” —Gretchen Rubin, author of *The Happiness Project* From birth, when babies' fingers instinctively cling to those of adults, their bodies and brains seek an intimate connection, a bond made possible by empathy—the ability to love and to share the feelings of others. In this provocative book, psychiatrist Bruce D. Perry and award-winning science journalist Maia Szalavitz interweave research and stories from Perry's practice with cutting-edge scientific studies and historical examples to explain how empathy develops, why it is essential for our development into healthy adults, and how to raise kids with empathy while navigating threats from technological change and other forces in the modern world. Perry and Szalavitz show that compassion underlies the qualities that make society work—trust, altruism, collaboration, love, charity—and how difficulties related to empathy are key factors in social problems such as war, crime, racism, and mental illness. Even physical health, from infectious diseases to heart attacks, is deeply affected by our human connections to one another. As *Born for Love* reveals, recent changes in technology, child-rearing practices, education, and lifestyles are starting to rob children of necessary human contact and deep relationships—the essential foundation for empathy and a caring, healthy society. Sounding an important warning bell, *Born for Love* offers practical ideas for combating the negative influences of modern life and fostering positive social change to benefit us all.

Curious Melvin discovers that the public library is the place where he can find just about anything—including three librarians who help in his quest for knowledge.

Learn to communicate with your dog—using their language —Good reading for dog lovers and an immensely useful manual for dog owners. “The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: “ How you can get your dog to come when called by acting less like a primate and more like a dog “ Why the advice to “get dominance” over your dog can cause problems “ Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief “ How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

An investigative exposé of the brutal conditions in treatment programs designed for troubled teens cites scaremonger tactics used by top programs as well as the survival stories of young people who have been abused by them.

The stunning success of *Reviving Ophelia*, Mary Pipher's landmark book, showed a true and pressing need to address the emotional lives of girls. Now, finally, here is the book that answers our equally timely and critical need to understand our boys. In *Raising Cain*, Dan Kindlon, Ph.D., and Michael Thompson, Ph.D., two of the country's leading child psychologists, share what they have learned in more than thirty-five years of combined experience working with boys and their families. They reveal a nation of boys who are hurting—sad, afraid, angry, and silent. Statistics point to an alarming number of young boys at high risk for suicide, alcohol and drug abuse, violence and loneliness. Kindlon and Thompson set out to answer this basic, crucial question: What do boys need that they're not getting? They illuminate the forces that threaten our boys, teaching them to believe that "cool" equals macho strength and stoicism. Cutting through outdated theories of "mother blame," "boy biology," and "testosterone," Kindlon and Thompson shed light on the destructive emotional training our boys receive—the emotional miseducation of boys. Through moving case studies and cutting-edge research, *Raising Cain* paints a portrait of boys systematically steered away from their emotional lives by adults and the peer "culture of cruelty"—boys who receive little encouragement to develop qualities such as compassion, sensitivity, and warmth. The good news is that this doesn't have to happen. There is much we can do to prevent it. Kindlon and Thompson make a compelling case that emotional literacy is the most valuable gift we can offer our sons, urging parents to recognize the price boys pay when we hold them to an impossible standard of manhood. They identify the social and emotional challenges that boys encounter in school and show how parents can help boys cultivate emotional awareness and empathy—giving them the vital connections and support they need to navigate the social pressures of youth. Powerfully written and deeply felt, *Raising Cain* will forever change the way we see our sons and will transform the way we help them to become happy and fulfilled young men.

Young eight year old Tory is like most kids, lighthearted, unbiased and charismatic. He enjoys being around any and everyone no matter their differences. What he didn't expect was a kid in class making fun of his different color socks. That was enough to cause frustration and embarrassment but what did Tory do? He used the opportunity to shine and proudly profess his inability to see color, which is the one thing that made him different from others. In this book you'll learn: " It's not nice to make fun of others " It's ok to be different " Embracing people and their differences is ok
