Design, install, and maintain HVAC pumps Filled with case studies and problem-solving sections, this reference offers HVAC engineers and technicians concrete methods for achieving efficient operation in utilizing the latest digital electronic technologies. Updated to include the latest information ranging from codes to the electronic evolution in HVAC pumping systems

Spec and install HVAC pumps with ease. Now it's easier than ever to select, install, operate, and maintain the right pump for any HVAC system--regardless of your level of experience. With HVAC Pump Handbook, by James B. Rishel, you get step-by-step techniques you can use to design the most up-to-date, high-efficiency systems in less time and with less effort--and use state-of-the-art digital electronic technologies to more accurately monitor their performance. You'll master all types of volute and axial flow pumps, and learn to dramatically reduce HVAC system energy consumption with variable speed pumping and piping systems. Ready-to-use formuals make complex calculations a snap, and handy tables give you at-a-glance access to crucial engineering data.

Develop the knowledge and skills you need to maintain and troubleshoot today's complex heating, air conditioning, and refrigeration systems with REFRIGERATION AND AIR CONDITIONING TECHNOLOGY, 8th Edition. This practical, easy-to-understand book provides hands-on guidance, practical applications, and the solid foundation you need to fully understand today's HVAC service and repair, its environmental challenges, and their solutions. Focused on sustainable technology in today's HVAC/R industry with an emphasis on new technologies and green awareness, the 8th Edition covers the latest advances in the industry and the all-important soft skills and customer relations issues that impact customer satisfaction and employment success. Memorable examples, more than 260 supporting photos, and unique Service Call features bring concepts to life and help you develop the critical skills you need for success in your future career. coverage of all important aspects of the design, operation, and maintenance of heating, ventilating, and air conditioning (HVAC) systems. Two-thirds of the handbook has been revised and rewritten, and it now features contributions from experts at top companies such as York, Rockwell, Honeywell, and Sverdrup. The book will enable users to produce very efficient and economical systems ... select and install today's most advanced equipment ... maintain high system performance ... comply with key codes and standards ... and understand the environmental impact of HVAC design.

Eshbach's Handbook of Engineering Fundamentals, the standard engineering reference work for over fifty years, has been updated and revised in this Fourth Edition. The coverage of the revised Handbook addresses all the fundamental subdivisions of engineering, including electronics, controls, fluids, with a special emphasis on the various elements of mechanical and aerospace engineering. The Fourth Edition includes entirely new chapters on materials, acoustics, and computers. In addition, all chapters have been rewritten and revised to reflect changes since the previous edition of the Handbook was published. The coverage is organized around these main subjects: mathematical and physical units, standards, and tables; mathematics; mechanics of rigid bodies; mechanics of deformable bodies; mechanics of incompressible fluids; aeronautics; astronautics; automatic control; computer science; engineering thermodynamics and heat transfer; electromagnetic and circuits; electronics; radiation, light, and acoustics; chemistry; engineering economics; and properties of materials. As in the previous editions, the coverage is given in capsule form to give the reader a basic understanding of the topic. References to more specific literature are also provided with each entry.

"In the world of the Talents, kids with supernatural powers are condemned to government research facilities from which they do not return. For a Talent, the most important thing is keeping the secret"--P. [4] of cover.
